

Health data sharing from the medical technology industry's perspective

14 November 2023

Alexander Olbrechts

Director Digital Health at MedTech Europe

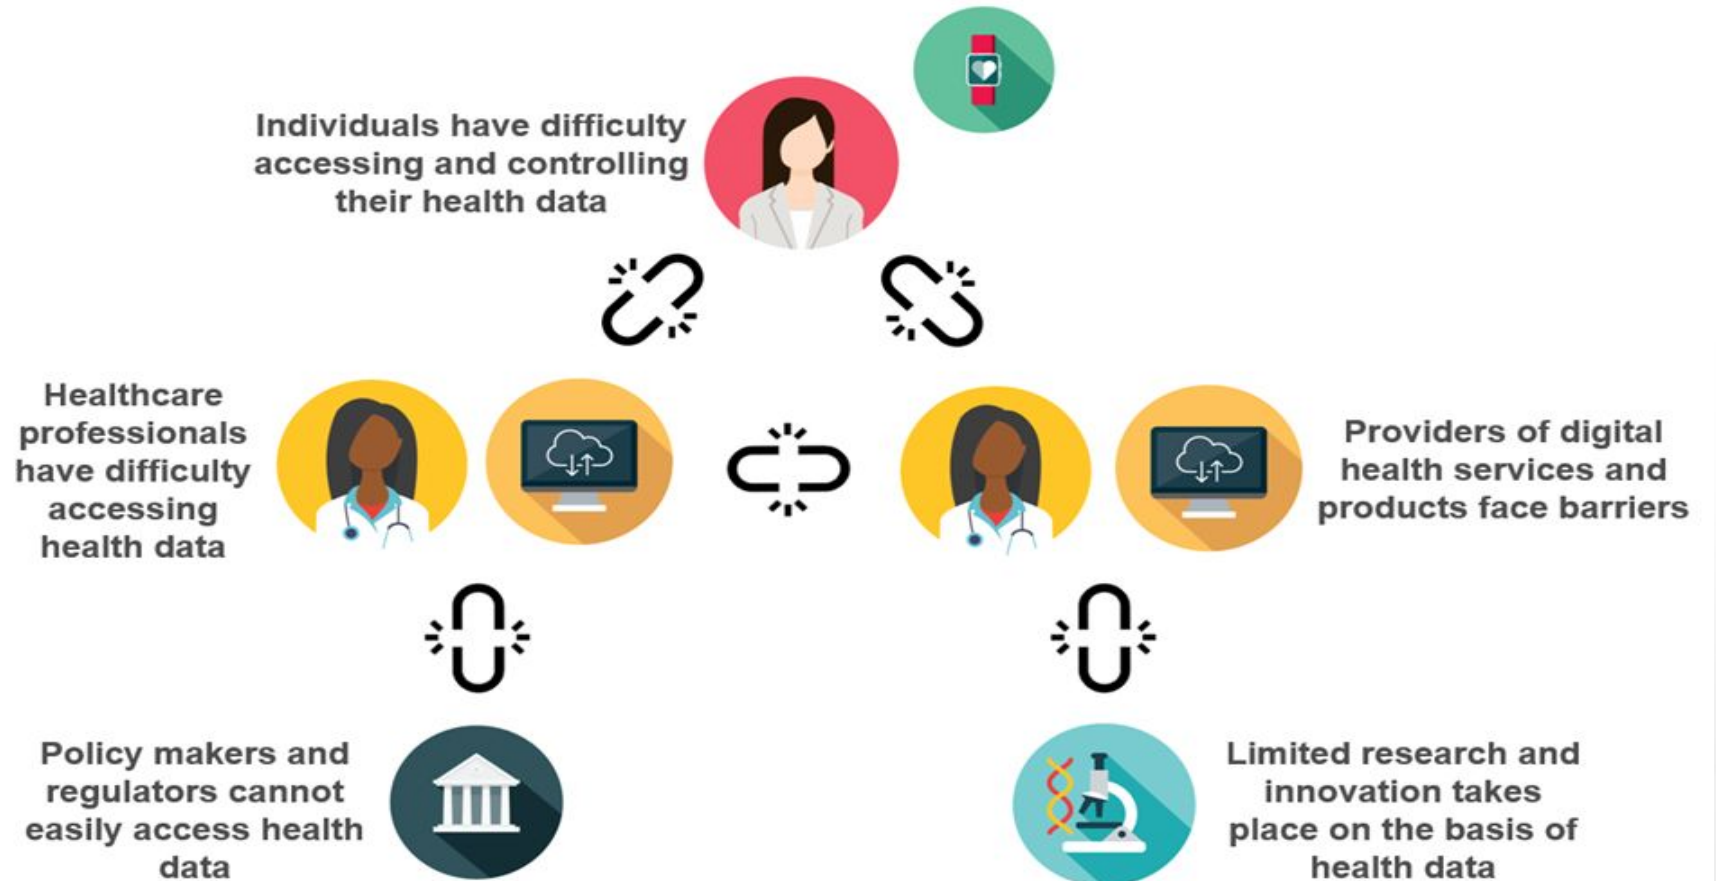

The Future of Digital Health at MedTech Europe

Main challenges in harnessing the power of health data

Primary use
of health data:
improve care delivery

Secondary use
of health data:
support research,
innovation and policies

Source: European Commission

EHDS from the MedTech industry's perspective

MedTech industries are an **integral part** of the health data ecosystem and are then **directly impacted** by the EHDS

The healthcare industry accounts for 30% of the data volume generated globally, while 97% of data produced by hospitals remains unused

Benefits of the EHDS

-  Access to electronic health data
-  Medical research and development
-  Enhanced interoperability
-  Single market for digital health

Importance of a clear framework

Reasoned scope & clear definitions

Opportunity to integrate **relevant and meaningful electronic health data** along the patient pathway

- Ensure clear terms and definitions
- Harmonised implementation across EU member states

Coherence with existing EU legislation

The EHDS regulation is **intended to complement other laws** established in the EU.

- Avoid duplicative, conflicting or multi-level requirements
- Ensure consistency with existing and future regulatory framework

Potential of secondary use

Access to data for secondary use

Essential to improve the **performance** of existing MDs and IVDs, and to **develop new and innovative technologies**

- Foster trust in data sharing while stimulating innovations
- Enable and encourage access to high-quality data

Towards a successful EHDS

Protection of trade secrets and IP rights

A well-executed EHDS that **guarantees well-established legal rights** can become a true **catalyst for healthcare innovation** throughout Europe.

Strong stakeholder inclusion

To guarantee the success of the EHDS, a **broad range of stakeholders must be involved** from the outset.

The MedTech industry is committed to positively contribute to the EHDS and share its experience

Any questions?
