The Digital Health Strategy for Catalonia: Advancing Towards the Open Platform Paradigm

28th of February 2024

Digital Health & Wellness Summit – MWC (Barcelona)

Jordi Piera-Jiménez PhD, MBA, FHIMSS

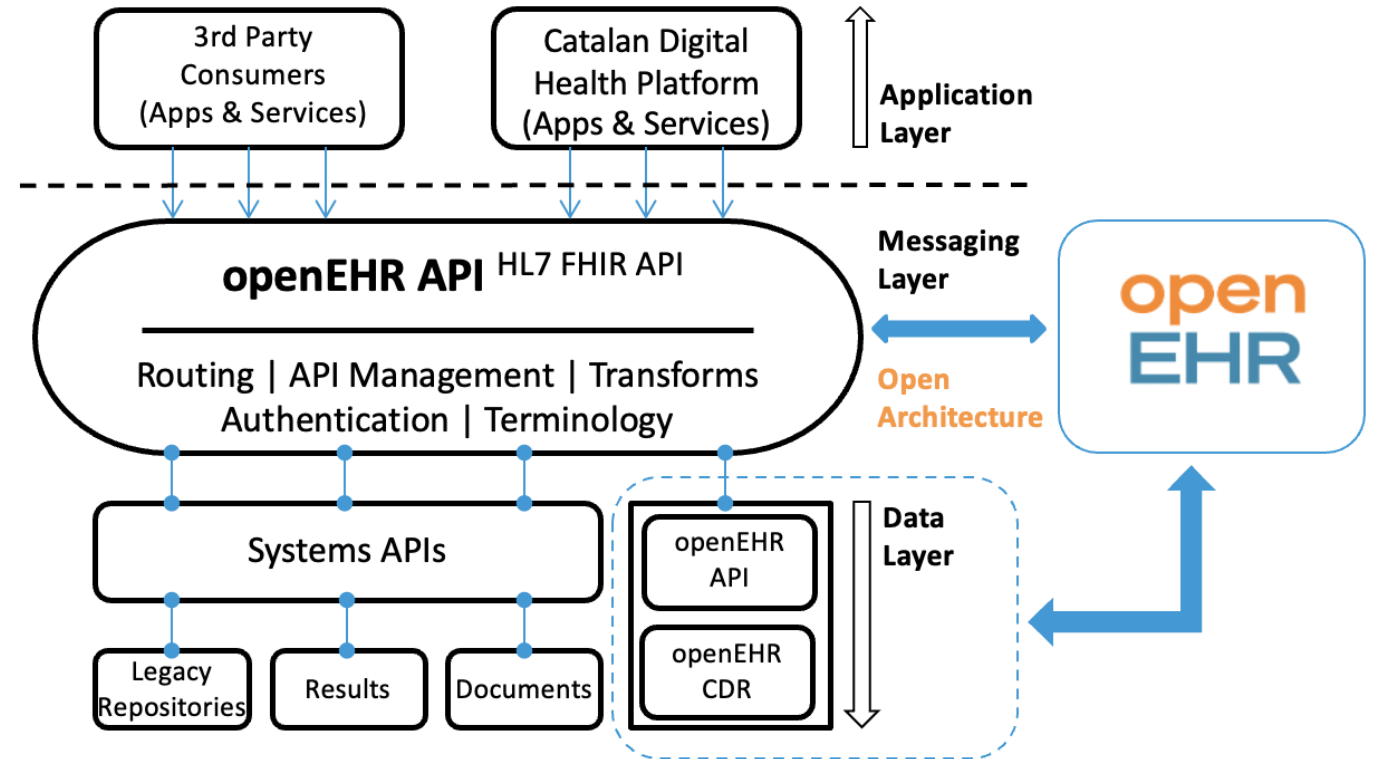

S/ The Catalan Digital Health Platform

S/ Towards the open platform paradigm!

The postmodern EHR Approach

- ✓ Full data fluidity and pathways that span health and care domains
- ✓ A unified and life-long clinical data repository (CDR) designed on open-data standards
- ✓ Support for full interoperability between vendors, technologies, and applications
- ✓ Vendor neutral
- ✓ Applications with a “care-team-driven” user experience
- ✓ Agile and modular

The open platform approach for Catalonia (source: adapted from the Apperta Foundation – United Kingdom)

Kanthan Theivendran
@KTheivendran

S/ Ongoing investments in Digital Health

1. Digital Health Strategy for Catalonia (first phase) → 40M €
2. Digital Health Strategy for Catalonia (second phase) → 150M €
3. Recovery and resilience funds → 35M €
4. Pharma industry funds → 25M €
5. ICU Command Centre → 14M €
6. Transformation projects → 30M €
7. Precision medicine → 10M €

Thank you!

Jordi Piera-Jiménez, PhD, MBA, FHIMSS
Director of the Digital Health
Strategy for Catalonia

Director, openEHR International

Professor collaborator, Faculty of
telecommunications, informatics and
multimedia, Open University of
Catalonia
