About the DHS

The Digital Health Society (DHS) - as the data arm of ECHAlliance – serves to enable multi-stakeholder dialogue on digital health and health and care data policies and practices. DHS represents a legacy born of the Estonian Presidency of the Council of the European Union in 2017, formed to promote the adoption of digital health and the use of health data.

About the GHCP

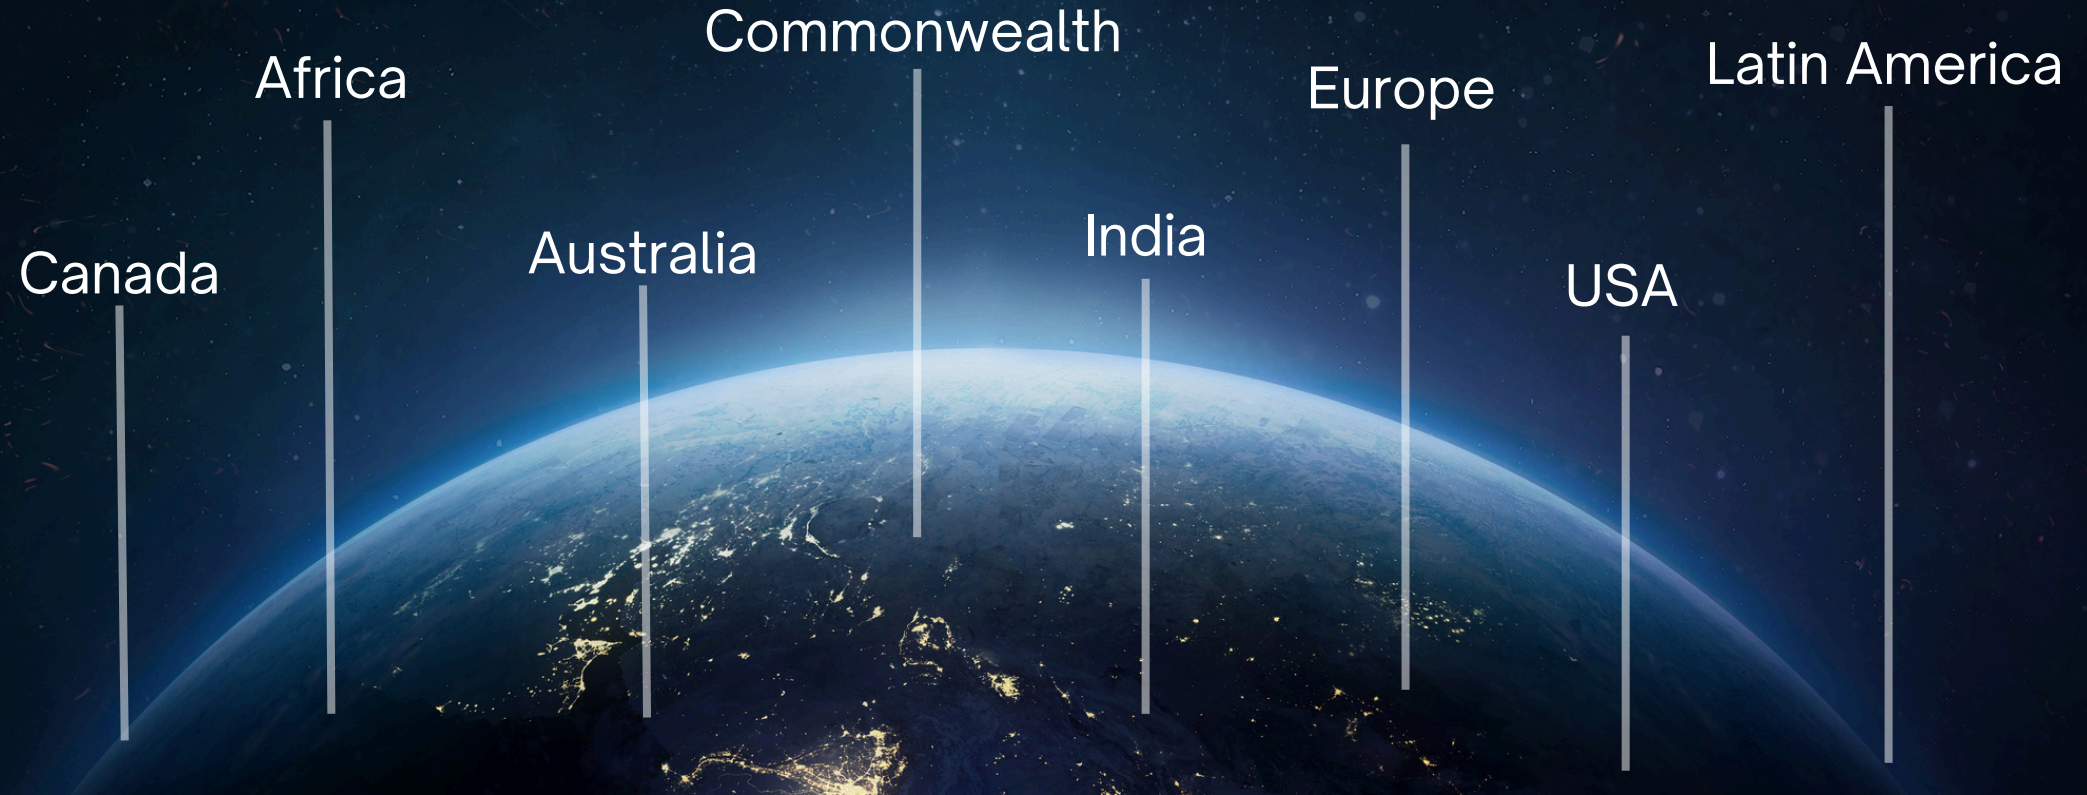

The Global Health Connector Partnership reflects a determined commitment of existing organisations to improve health and care for citizens worldwide through the appropriate use of digital technologies in the provision of health and care services.

GHCP connects global health communities targeting health inequalities, skills and data. The GHCP Council includes leading organisations from USA, Africa, Commonwealth, Australia, India and Europe.

Digital Health Society Summit 2024

#DHSS24

Modernisation in healthcare in the next five years:
How will healthcare embrace digitalisation and catch up on other sectors

The Summit will look into the challenges healthcare systems face to take advantage of digital technologies and the benefits they could deliver. Content will include :

- Introduction to digitisation in healthcare and why healthcare lags behind other sectors in embracing the benefits of digitisation
- Future visions for digital health - exploring opportunities
- Data Analytics: process efficiency, clinical decision support and better results
- Scaling hospital at home solutions and strengthening primary care and preventive measures

- Increasing secondary use of health and data innovation
- Reducing workload of HCP and administrative burden
- Skilling, reskilling, upskilling HCP for digital age
- European interoperability efforts - European EEHRxF
- Data access and European Health Data Space
- AI in healthcare: opportunities and considerations in light of the AI Act

This unites our work in Europe with our work with the Global Health Connector Partnership in Africa, India, the Americas and the Far East and builds on our global audience of over 1,200 registrations from 94 countries in 2023.
