

ECHAlliance Global Health Connector Event @ Science Summit

**United Nations General Assembly
(UNGA80)**

**SEPTEMBER
22-24 2025**

**NEW YORK
& VIRTUAL**

Overview

ECHAlliance, The Global Health Connector will convene two days of discussion including key note speakers, panel discussions and networking, bringing together key leaders from European Union, Africa, India, Latin America and the United States. Key topics will include:

- Women's Health
- AI
- Data & Digital

Vision

In an age where technology and healthcare are increasingly intertwined, the advent of digital health is set to redefine the contours of medical care, accessibility, and innovation. ECHAlliance invites you to be part of a pivotal gathering at the UN Summit of the Future, during the esteemed Science Summit of the UNGA80, to navigate this new frontier.

Our world stands on the brink of a healthcare revolution, propelled by the strides in digital technologies. From the convenience of telemedicine to the precision of AI-driven diagnostics, the possibilities are boundless. Yet, such transformation is not without its trials, demanding a concerted effort to weave through ethical dilemmas, regulatory landscapes, and the quest for equitable access.

ECHAlliance, The Global Health Connector @ UNGA80 Science Summit is envisioned as a crucible for thought leadership, where the brightest minds across sectors converge to sculpt the future of healthcare. It's more than a conference; it's a collaborative incubator for ideas that will shape tomorrow.

Why will your experience at the Science Summit in 2025 be totally unique?

- In our first year at the Science Summit we learned that in order to ensure both the quality and number of attendees we could not only rely on UN attendees registering. Accordingly we carefully co-create an invitation list with our partners along with our US and UN contacts, that will ensure good attendance.
- We have extensive contacts in the US and will work with you to select invitations in the areas of the US that you have targeted. This could include prospective customers, policy makers and partners.
- There will be an opportunity for your organisation to contribute to other partner programmes.
- We understand the venue and have a good relationship with Cure team, including AV and catering. This will help to deliver a first class experience which includes the ability for online speakers and attendees as well as a full recording of your programme, which you can use for wider business development purposes.
- We can offer the option to partner or host networking breakfasts, drinks reception or dinner.

Why should you partner with us for the UNGA Science Summit in 2025?

- Increase your organization's visibility and awareness through sponsorship of key initiatives worldwide, supporting the SDGs and using these demonstrations to build global partnership and alliances.
- Establish your brand as a key innovator that has a leadership role to play in global innovation, including providing a global entry point of collaboration in multiple regions.
- Collaborate with key experts from diverse regions to promote a global entry point for collaboration.
- Join us in a multilateral dialogue on science and innovation in women's health research.
- Become part of the global development agenda. This event will bring together development agenda policymakers and demonstrate how science can contribute very constructively to the broader development agenda.

What to expect

ECHAlliance's two days of programming on 22nd and 23rd September will include keynotes, plenary sessions and roundtable discussions. The exact format is flexible and can be agreed with you.

You can design:

- **Interactive Sessions:** Dive into a tapestry of keynote speeches, engaging panels, and intimate roundtables, each designed to spark dialogue and inspire action.
- **Collaborative Opportunities:** Join forces with leaders from diverse backgrounds, including government, academia, industry, and civil society, to forge partnerships that transcend borders.
- **Hybrid Format for Enhanced Engagement**

The Science Summit

The Science Summit is an official series of events forming part of the United Nations General Assembly.

The 11th edition of the Science Summit, organised by ISC Intelligence and partners is a leading global event to promote the contribution of science to achieving the UN Sustainable Development Goals for areas critical for our shared future: people, the planet, prosperity, peace and partnerships.

Target audience for the Science Summit are leaders in a range of fields and industries, scientists, technologists, innovators, policymakers, decision-makers, regulators, financiers, philanthropists, journalists and editors.

Aims:

Integrating Science into the International Financing Agendas:

- Explore innovative financing mechanisms to support science-driven solutions for global challenges.
- Discuss the role of governments, industry, and international organizations in funding sustainable scientific initiatives.

Industry as a Catalyst for Implementation

- Highlight how industries can translate scientific objectives into actionable projects.
- Showcase case studies of successful collaborations between science and industry to create tangible societal impacts.
